India Food Delivery Market Analysis

ARIJIT BISWAS

Executive Summary

- India food delivery market ~₹70,000+ Cr annually
- Highly concentrated duopoly market
- Strong growth driven by Tier-2/3 expansion
- Significant opportunity in frequency & retention

Problem Statement

- Estimate market size of India's food delivery industry
- Identify key growth opportunities
- Provide actionable recommendations

Approach

- Market Size = Users × Orders × Avg Order Value
- Used hypothesis-driven structured analysis
- Combined public data with logical assumptions

Market Overview

- Market size ~$7–8B annually
- 2.7B+ orders per year
- Dominated by Zomato & Swiggy
- Growing at ~20% annually

Market Sizing Logic

- Users: ~40M
- Orders per user: ~5/month
- Avg order value: ₹300

Final Calculation

- Monthly Market Size: ₹6,000 Cr
- Annual Market Size: ₹72,000 Cr (~$9B)
- Large and rapidly growing sector

Key Insights

- Duopoly limits competition but drives scale
- Tier-2/3 cities are key growth drivers
- Young users dominate demand
- UPI & digital payments accelerate usage

Strategic Recommendations

- Expand aggressively into Tier-2/3 markets
- Introduce subscription-based delivery models
- Leverage cloud kitchens for cost efficiency
- Use AI for personalization and retention

Conclusion

- India food delivery market is high-growth
- Strong opportunity for expansion and innovation
- Data-driven strategy will define winners
